

With **FPS GOLD**, you know you already have a great core. But did you also know that **Elan Financial Services** is a preferred ATM & debit processor that is uniquely positioned to integrate seamlessly with your existing architecture?

But don't just take our word for it - here's what a fellow FPS GOLD customer had to say about us:

"Implementations are never easy. But Elan's experience and familiarity with the FPS GOLD platform made the integration better than we could have hoped for. The responsiveness of their customer service team and our relationship manager have exceeded our expectations. They value us as a customer and as a friend. Way to go, Elan."

- Sandra Gray, SVP, Shelby Savings Bank

Elan Financial Services, a division of U.S. Bank, is a single-source provider of ATM and debit services to over 1,500 financial institutions nationwide and provides a complete range of processing and payments services, including credit card issuing and ATM and debit card processing. Elan provides transaction processing, terminal driving and monitoring and support services for more than 35,000 ATMs nationwide and supports more than 40 million ATM and debit cards. With 50 years of experience in the EFT business, we have built a reputation of providing smart, scalable ATM and debit card processing solutions that go far beyond technology.

Furthermore, Elan will support chip card key management, authorization and educational staff training necessary to assure a smooth implementation.

Why FPS GOLD and Elan?

- A partnership that extends over 13 years
- Our CACM (Card Account Card Management) single-point entry eliminates redundancy and improves cardholder records
- Simplified Settlement improves the reconciliation and compare process
- Elan reports are automatically made available in CIM GOLDView[®]
- Almost 50% of the FPS GOLD customer base relies on Elan for their ATM & Debit processing
- The shared Elan/FPS GOLD circuit supports ATM traffic, eliminating extra telecom cost
- Elan offers online real-time authorizations and "instant issue" of cards is supported
- Elan is EMV-certified

Elan provides full program support for all your ATM and debit needs

- [ATM Solutions](#)

Simply put, no single company can offer the range and scope of services of Elan. As your ATM channel continues to grow and evolve in extraordinary ways, it's critical to align yourself with an organization that has the scale and depth of experience to predict changes, adapt as needed and act quickly. Elan is the industry's only true end-to-end provider, and the only processor that's uniquely positioned to propel your ATM channel to the top. Services from Elan include authorization processing, terminal driving, card management, full service, single-point settlement and complete program support. For you, this means increased revenue, decreased expenses and reliable delivery. And for your cardholders, it means maximum convenience and availability.

- [Debit Card Programs](#)

Convenient for your cardholders, profitable for you. When it comes to debit cards, everybody wins. Your cardholders enjoy greater convenience, flexibility and security when they pay with debit cards, while in turn you generate additional revenue and enhance relationships. Elan debit solutions provide full program support, including card management, two marketing programs, single-point settlement and reporting

- [ATM Managed Services](#)

Elan ATM Managed Services provides an outsourcing service for any and all ATM-related services that keep your ATMs operational. Our flexible solutions offer advanced functionality that furthers revenue opportunity, prepares you for the next wave of technology, supports your ability to meet compliance deadlines, and helps attract and retain cardholders. You'll also have the support you need to stay ahead of the curve and maintain a successful ATM program — and all from a single source.

- [Fraud Management](#)

Elan offers a comprehensive suite of fraud protection products that provides layers of security. From activation strategies, to card level verification checks, to neural network transaction monitoring and real time card blocking, we have you covered. Since our fraud prevention and monitoring tools are designed to work together, you gain an arsenal of protection that can limit your losses and allow your cardholders to use their ATM and debit cards without worry.
